FUNFACTS

**FOR INTERNAL USE ONLY.**

- **The Solar Panels**

The club has set up solar panels to harness renewable energy and reduce electricity consumption. These solar panels are part of a photovoltaic system that converts sunlight into electricity. The energy generated is converted from a direct current to an alternating current using an inverter.

- **Creating Awareness**

Moreover, they're actively engaged in raising awareness among their guests and staff about saving electricity in their daily lives. They encourage everyone to be a part of this effort to conserve energy and promote sustainability.
